

# Computational finance 2024-2025.

## Energy finance project rules:

- Projects must be submitted within the deadlines based on the exam calls published on webeep. Earlier submissions are appreciated.
- Submit the project to [luca.russo@polimi.it](mailto:luca.russo@polimi.it).
- You are asked to write a report (up to a maximum of 10 pages) and a Matlab code.
- An ideal report should answer to the questions posed in the project files, with detailed comments of the results and the methods used.
- The Matlab code must be well commented and readable.
- The evaluation takes into account both the results and the quality of the report and the code submitted. An inefficient code or a lack of comments in it or in the report will be penalized.

Groups 1 and 2 are assigned to the project A.

Groups 3, 4 and 5 are assigned to the project B.

Groups 6, 7 and 8 are assigned to the project C.

Groups 9, 10 and 11 are assigned to the project D.

Good luck and good work!

Luca Russo
